

Strips & Extrusions

Introducing Delight - your comprehensive guide to Trend's lighting solutions.

Delight is organised into seven distinct sections: **Downlights, Track Systems, Panels & Troffers, Linears & Battens, Strips & Extrusions, Pendants,** and **Exterior**. Each chapter presents a curated view of our complete product offering in a cohesive and accessible format.

Explore new products, innovative features, and technical advancements showcasing our craftsmanship.

Delight blends print and digital elements to deliver a richer, more immersive experience—through iconography, photography, and precise illustrations. It's a practical and inspiring tool designed to help you navigate our solutions with clarity and confidence.

delight

Diversity Efficiency Value Innovation Quality

We're market leaders and pioneers in lighting technology. We've been **enhancing environments, illuminating spaces and delighting customers** for over **39 years**.

An Australian business with a unique mix of efficiency and versatility, functionality and aesthetics, our high-quality products and innovative lighting solutions are loved by the most well-known brands in Australia.

We're lighting experts. We create value adding lighting solutions with the product range, experience and expertise to meet all our clients' functional and aesthetic requirements. From design to product choice, implementation and beyond, our consultants, designers and engineers are here to support our clients.

Lighting the way since 1986

1986

An electrical contractor in Pagewood sees opportunity in the Australian lighting industry and opens Trend Lighting.

Trend icon is designed this year — and still in use to this day.

1990

Great products and service brings early success and Trend Lighting establishes a production facility in Sydney's inner south.

1991

Prints the first ever lighting catalogue featuring a range of 30+ metal halide, halogen and compact fluorescent downlights and spotlights.

1995

Reaches a new milestone when the Trend's products PF04 70W and 15W metal halide downlight becomes the best-selling luminaire.

2003

Launched first company website, delivering better access to information and improved communication, with the aim of growing the brand nationally.

2009

The success continues. Trend relocates to a new building in Rosebery after outgrowing their previous production facility.

2010

Trend begins research and development into LED technology. Trend hires their first designer who is responsible for lighting designs and producing catalogue.

2011

Celebrates 25 years by launching first LED luminaire - the XDA10, followed closely by XDM28 and XDL52.

2012

Our production increases and we open a new manufacturing plant. Shortly after, we launch our first LED lighting catalogue with the addition of over 25+ LED luminaires.

2016

Following continued growth, Trend moves to a larger head office and warehouse in Mascot and establishes a second office in Brisbane.

2018

We're awarded the Westpac Business of Tomorrow Award. This award recognises outstanding Australian businesses that are shaping the future.

2019

Opens an office in Melbourne extending our ability to service the Australian eastern seaboard market.

2020

This is the year that we introduce our sister company – Trend Laboratories – specialising in interior design and testing, photometric testing and design services for the lighting industry.

2021

Celebrates 35 years of product innovation and customer satisfaction by announcing the launch of Trend For Trade – lighting products that cater to our 900 distribution networks.

2022

Commences photometric testing at our in-house laboratory in Sydney using near-field goniometer and spectroradiometer.

2023~

Redesigns the brand to symbolise our ambition for unity and growth, combining our strengths from the past with our excitement for the future.

Iconography Guide

A quick way to understand our iconography

● **Emergency Lighting**

Backup for power outages, both maintained and non-maintained, ensuring safety in emergencies.

Denoting COI compliant lighting fixtures, used to enhance clinical observations, aiding in the detection of cyanosis for patient care.

Power input to accommodate different levels of electrical voltage, providing flexibility in installation and compatibility with different power sources.

Responsive to subtle movements, covering a wide area for enhanced energy efficiency and security.

● **Motion Sensor**

● **Trim Colour**

Refers to the visible outer ring or housing of a light fixture, enhancing the overall appearance of the luminaire.

SMD and COB are two LED chip types. SMD employs multiple smaller LEDs on a PCB for versatility, while COB utilises a single, larger LED chip for enhanced efficiency and seamless lighting application.

Refers to the perceived warmth or coolness of light, measured in Kelvins (K) - higher values appear cooler while lower values appear warmer.

● **Insert Colour**

● **Medical Lighting**

SMD and COB are two LED chip types. SMD employs multiple smaller LEDs on a PCB for versatility, while COB utilises a single, larger LED chip for enhanced efficiency and seamless lighting application.

Refers to the perceived warmth or coolness of light, measured in Kelvins (K) - higher values appear cooler while lower values appear warmer.

● **Colour Temperature**

● **CCT Technology**

Colour temperature technology offers choices ranging from dynamic RGBW options for colorful environments to tunable solutions providing flexibility, and fixed settings catering to specific lighting preferences and applications.

Measures how accurately a light source reveals the true colours of objects - higher values indicate better colour accuracy, enhancing visual clarity and perception.

● **Colour Technology**

● **Beam Angle**

Defines the spread of light emitted from a source - a wider angle provides broader illumination while a narrower angle focuses light more intensely in a specific direction.

The IP rating is represented by two digits (e.g., IP65); the first denotes dust resistance, and the second indicates water resistance. Higher values signify greater defense against environmental elements.

● **Ingress Protection**

● **Impact Resistance**

The rating indicates the level of protection against damage from drops or collisions, with higher values signifying greater resistance.

Rating to determine safe electrical connections by preventing contact between conductive materials.

● **Insulation Contact**

● **Driver Type**

Regulates the electrical power supplied to light fixtures, converting the incoming electrical voltage to the appropriate levels required for the LEDs to function optimally.

Indicates that the product or service is designed by an Australian entity, promoting support for local businesses and industry.

● **Australian Designed**

Reading Guide

Following a comprehensive brand refresh, our order code structure has been meticulously refined to enhance accessibility for you. This informative guide will facilitate seamless navigation through our product code matrix.

01

Product Code

02

Product Features

03

Order Code

In the product code breakdown situated above each product page, all possible variations have been detailed out for each attribute.

Entries presented in black text are designated as the default configuration, referring to the specific options currently displayed on the product page.

For instance, in this example, **'4000K,' 'CRI 90+ Standard,' 'WB,' 'White,'** and **'LT'** appear in black text, signifying that these are the configured options visible on the page.

Greyed-out texts denote alternative options that are viable for configuration, providing flexibility to customise the product according to project requirements.

04

Product Attributes

The iconography shown in Product Attributes denotes the specific options currently displayed on the product page.

Sculpt light with flexibility

NeonLine brings a refined, architectural approach to flexible lighting. With its neon-like glow and dual-directional bending, it offers designers the freedom to shape seamless lines of light across curves, corners, and contours. It’s an ideal choice for expressive accents, spatial definition, and modern surface integration—indoors or outdoors.

Flexiled XFW1260 go to page 22

Bold light, engineered to endure

Encased in clear silicone for a minimal and durable design, the Flexiled XFW1260 offers IP65-rated protection. This enables the strip to withstand harsh environments, ensuring a longer lifespan while maintaining consistent light quality and appearance over time.

Tailored extrusion for every application

Engineered to complement our LED strip range, the extrusion collection offers flexible solutions for a wide range of applications. With options for recessed, surface-mounted, and suspended installations, each profile combines functionality with refined aesthetics. Diffuser choices and varied form factors empower designers to achieve clean lines, visual comfort, and tailored lighting effects across commercial spaces.

Category	Strips & Extrusions
Family	Extrusions
Surface	Ceiling Wall
Mounting	Surface Mounted
Ingress Protection	IP20

Physical Characteristics

Trim Colour	White Black
Dimensions (WxH)	45 x 42 mm
Maximum Length	3000 mm*

* Custom lengths available

Dimensions (mm)

Extrusion EX241

Recessed Extrusion with Narrow Profile

Product Code	Trim Colour	Accessories
EX241	W (White)	OP (Opal Lens)
	B (Black)	

Order Code **EX241-B-OP**

Product Features

- Recessed aluminium extrusion profile with narrow trim profile and flat opal diffuser
- Can mix and match with recommended LED strips of up to 3 continuous metres
- Supplied with mounting clips for easy installation

Product Attributes

To configure this extrusion, please visit trendlighting.com.au/product/extrusion-EX241

Physical Characteristics	
Trim Colour	White Black
Dimensions (WxH)	65 x 60 mm
Maximum Length	3000 mm*

* Custom lengths available

Dimensions (mm)

Extrusion EXR35

Recessed Extrusion with Narrow Profile

Product Code	Trim Colour	Accessories
EXR35	B (Black)	CLR (Clear Lens)
	S (Silver)	OP (Opal Lens)

Order Code **EXR35-B-OP**

Product Features

- Recessed aluminium extrusion profile with narrow trim profile and flat opal diffuser
- Can mix and match with recommended LED strips of up to 3 continuous metres
- Configured with a clear or opal diffuser
- Supplied with mounting clips for easy installation

Product Attributes

To configure this extrusion, please visit trendlighting.com.au/product/extrusion-EXR35

Physical Characteristics	
Trim Colour	Black Silver
Dimensions (WxH)	50 x 55 mm
Maximum Length	3000 mm*

* Custom lengths available

Dimensions (mm)

Extrusion EXS35

Surface Mounted Extrusion with Narrow Profile

Product Code	Trim Colour	Accessories
EXS35	B (Black) S (Silver)	CLR (Clear Lens) OP (Opal Lens)

Order Code **EXS35-B-OP**

Product Features

- Surface mounted aluminium extrusion profile with flat opal diffuser
- Can mix and match with recommended LED strips of up to 3 continuous metres
- Configured with a clear or opal diffuser
- Supplied with surface mounting clips for easy installation

Product Attributes

To configure this extrusion, please visit trendlighting.com.au/product/extrusion-EXS35

Physical Characteristics

Trim Colour	Black Silver
Dimensions (WxH)	35 x 35 mm
Maximum Length	3000 mm*

* Custom lengths available

Dimensions (mm)

General Characteristics

Category	Strips & Extrusions
Family	Extrusions
Surface	Ceiling Floor Wall
Mounting	Surface Mounted
Ingress Protection	IP20

Extrusion Options & Accessory

Extrusion EX12R, Extrusion EX241, and Extrusion 245

Extrusion ZTL

Surface Mounted Wide Extrusion

Product Code	Trim Colour	Accessories
ZTL	W (White) B (Black)	OP (Opal Lens)

Order Code **ZTL-B-OP**

Product Features

- Surface mounted extrusion profile with clip in acrylic diffuser with 2 position options, providing smooth light beam distribution
- Featuring interlocking system providing the ability to create seamless linear lighting installations
- Can mix and match with recommended LED strips of up to 3.6 metres

Product Attributes

General Characteristics

Extrusion ZDA

Surface Mounted Streamline Extrusion

Product Code	Trim Colour	Accessories
ZDA	W (White)	OP (Opal Lens)
	B (Black)	

Order Code **ZDA-B-OP**

Product Features

- Surface mounted streamline extrusion profile known for its slim design and versatility
- Exudes timeless design by showcasing excellent balance between aesthetics and functional lighting
- Manufactured from extruded aluminium with powder coated finish and opal acrylic diffuser for smooth beam distribution
- Can mix and match with recommended LED strips of up to 3 continuous meters

To configure this extrusion, please visit trendlighting.com.au/product/extrusion-ZDA

Suspended Uni-directional Streamline Extrusion

Product Code	Trim Colour	Accessories
ZDA-D	W (White)	OP (Opal Lens)
	B (Black)	

Order Code **ZDA-D-B-OP**

Product Features

- Suspended streamline extrusion profile with direct light component, slim design and versatility
- Exudes timeless design by showcasing excellent balance between aesthetics and functional lighting
- Manufactured from extruded aluminium with powder coated finish and opal acrylic diffuser for smooth beam distribution
- Can mix and match with recommended LED strips of up to 3 continuous meters
